Introducing Vannair® Inhaler

The pMDI equivalent of Symbicord® Turbuhaler®

Freedom to select a delivery system that suits the needs and preferences of patients1,2

Vannair® Inhaler

- A pMDI device, free of any ozone-depleting agents3
- New device that includes a dose counter and non-detachable mouthpiece cover4

How to use Vannair® Inhaler

Instructions for correct use of Vannair® 80/4.5 µg and 160/4.5 µg:

1. Shake the inhaler well before each use to mix its contents properly.3

2. If the inhaler is new, prime the inhaler by actuating it twice into the air. You can use one or two hands as shown in Figure 2 and 3 below. Priming is also needed if the inhaler has not been used for more than one week or if it has been dropped.3

3. Hold the inhaler upright, use your thumb at the base of the inhaler and your index finger on the top. Breathe out gently. Place the mouthpiece into the mouth between your teeth. Close your lips (Step 4). While breathing in slowly and deeply, press the counter firmly to release the medication.3

4. Continue to breathe in and hold the breath for about 10 seconds or as long as is comfortable. Shake the inhaler again and repeat Steps 3 and 4 for the second inhalation.5 Replace the mouthpiece cover.3

5. Rinse the mouth with water after using Vannair® Inhaler to minimise the risk of oral thrush.3 Do not swallow the rinse water.3 (Step 5).

6. Clean the mouthpiece of the inhaler at least once a week with a clean dry cloth. Do not put the inhaler into water.

Important information about Vannair® Inhaler:

- The arrow on the top of the Vannair® Inhaler points to the number of inhalations left in the inhaler.3
- The counter will count down to zero (‘0’) each time you release a puff of medicine.3
- When the arrow on the counter enters the yellow area, there are about 20 puffs left.3
- Discard the Vannair® Inhaler when the counter reaches zero.3
- The canister inside the Vannair® Inhaler can only be used with the Vannair device. Do not take the inhaler apart.
- Always replace the mouthpiece cover.3
